OTHER USEFUL INFORMATION:

We operate a flea free facility and in order to maintain this standard, flea treatments are required for boarding. We require **Nexgard, a monthly flea chewable for dogs, and **Revolution**, a monthly, topical flea application for cats, which is given upon arrival. (Various other preventatives can be approved through vet prior to boarding)

We feed Purina EN, a veterinary prescription diet to our boarders, which is a very mild diet that helps prevent tummy upset.

Boarding stays include 3 walks/day. We provide food, food dishes, and bedding. You may also bring any items from home you wish for your pet to have while boarding; however, be advised that **Tyson Animal Hospital is not responsible for any items that are lost or damaged while boarding.**

Any special diets and medication may be administered while your pet is boarding at no extra charge. **Please bring food and/or medicine, along with administration instructions at the time of drop off.**

We require proof of current vaccinations prior to your boarding stay. **Rabies, Dhp/FVRCP, CIV (dogs only) and Bordetella (dogs only)** vaccines must be up to date. We must also see proof of a **fecal examination (dogs only)** that was performed within the last 6 months and had a negative result.
